# EGNYTE

Egnyte Sign

While eSignatures expedite document approvals, siloed eSignature solutions present challenges including data sprawl, distorted user experience, and increased IT costs and management hassles, impacting business flow and productivity negatively. **Egnyte Sign addresses these challenges and simplifies document approvals by streamlining the esign process, ensuring legal compliance.**

Native to Egnyte, the user-friendly interface enables users to seamlessly generate legally binding signatures on a variety of file types including PDFs, Word Documents, Google Docs, and Images. All signed documents can be managed effortlessly from the dedicated "Workflows & E-Signatures" tab within Egnyte. Egnyte Sign is available as a part of PDF File Handler add-on.

Key Features:

- Add Multiple Signers

- Sequential and Parallel Signing

- Adherence to ESign Act

- Add custom text fields on the document

- Add custom message and due date

- Option to eSign by typing, drawing or by adding an image

- Preview signed documents in the "Workflows and Signatures" tab

Benefits:

Seamless User Experience

Experience seamless user experience by eliminating the need to switch between multiple platforms for completing the eSignature process.

Efficiency Improvement

Sequential signing simplifies document processes, ensuring order, compliance, and efficiency with improved accountability and security.

Cost Reduction

Save costs by eliminating point solutions /applications required to perform PDF editing and eSignatures.

Egnyte fuels business growth by enabling content-rich business processes, while also providing organizations with visibility and control over their content. Egnyte's cloud-native content platform leverages the industry-leading content AI engine to deliver a simple, secure, and vendor-neutral foundation for managing content across business applications and storage repositories.
